TANKLESS®

Innovation

*A new paradigm in toileting that introduces a Tank-less toilet
to create ease for the whole family with a Comforting warm
seat for those Cold winter mornings, an Automatic whirlpool
flush with LED Blue light to light up your night*

Night Light

The LED light is designed to light up the bowl making it easier to use at night. Auto/Off with the remote.

Available In

- Ceramic Porcelain
- Acrylic (Commercial Grade)

Hi-tech wireless remote

All Bidet functions are available by remote control and the light displays the current operation.

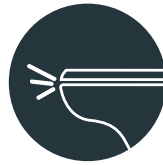

Auto flushing

A small flush of 3L will be used if the seat is occupied for less than 25 seconds. A full flush of about 4.5L will be used when the seat is occupied for over 25 seconds. Dual auto flush is available by seat sensor after the user stands up.

Seat sensor

The seat sensor detects when you sit down on the seat to activate functions and allows the toilet to flush when you leave.

Soft Close

The seat and lid close down softly.

Heated seat

The seat temperature is adjustable. An ergonomic elongated seat for comfort.

S-Trap / P-Trap Compatible

No noise on interlayers. Cost effective against In-wall-hung toilet systems and much easier to perform maintenance.

Super water saving toilet

The system features perfect flushing even with low water pressure (1.5kgs/cm². 20L/min) with a considerable water saving of 3L for a half flush and 4.5L for a full flush. (Min 150 kPa - Max 750 kPa, with 20L per minute water flow required)

Siphon water jet, Tornado flushing

Waste is flushed by the use of high pressure jet nozzles, known as Tornado flushing. This system, while extremely efficient uses only a small amount of water with its Siphon water jet technology.
